Precision CNC Machining

Stellar Precision Components is a Woman-owned small business and a provider to build-to-print precision machining and manufacturing services. Their 45-year history in the aerospace and defense industry makes us uniquely qualified to quickly respond to customer needs and have a thorough understanding of critical requirements.

Their capabilities include 3, 4 & 5 milling (largest table is 36"x48"x120"). Large diameter turning (up to 35"), Wire edm, nondestructive testing, state-of-the-art inspection technology and programming using solid modeling.

They employ over 70 people and operate three shifts to support critical schedules. They are experienced with a wide variety of materials from basic carbon steels to exotic alloys. Stellar offers turnkey solutions and partners with qualified special process providers to offer vertically integrated supply of chain value.

They are hiring! If interested in joining their team, reach out to them at 724-523-5559 or visit their website, www.StellarPrecision.com for more information.
